WebDefence for Server

DwebConsults Solutions WebDefence for Server is our Server Security solution that provides all round cyber security audit and protection to client's server infrastructures. With WebDefence for Server, we lift the burden of server security off the shoulders of our clients so they can focus on other important things while they let the experts take care of security issues.

Features of WebDefence for Server

- Server security audit, penetration test and compliance check for HIPAA, ISO 27001 and PCI DSS.
- Server hardening for advanced security protection.
- Since an out-of-date system is a security risk, WebDefence provides automatic and rebootless kernel update and patch management to mitigate system vulnerabilities.
- AI powered firewall security management to protect from malicious traffics including bruteforce and DDOS attacks.
- Intrusion detection and protection system that keeps attacker at bay from server.
- Protection against malware injection attack perpetrated via hosted web applications.
- Automated around the clock malware scanning, detection and response system that stops and cut short malicious attacks.
- Around the clock server security monitoring and performance checks.
- Backup and recovery system to ensure services continuity within the shortest time with little or no loss of data even in extreme case of disaster.
- Complete managed security service so that our client can just focus on other important things and let us handle security issue.

Summary and Pricing

WebDefence for Server is a powerful tool that is a must for security conscious individuals and organisations and when combined with other WebDefence products would have created an enterprise level security solution in place for security sensitive organisations.

We know that each individuals and organisations have different security requirements that is why we use custom based pricing plan to better suit the budget of clients. For price quote request or more information, contact us at billing@dwebconsults.com or info@dwebconsults.com
